

Research Associate (m/f/d) – Full-time

Origimm Biotechnology GmbH is an international early-stage biotech company located in **Vienna** with a dedicated and highly motivated small team. With the development of new vaccines, immune therapies and skin health products, we strive to improve the quality of life of patients by improving skin health and preventing or treating skin microbiome-associated disease. We stand for innovation and honesty and always demand the highest standards from ourselves and our products out of respect for the patients.

To enable our small and personable R&D team to concentrate on their core activities, we are looking for a full-time **Research Associate (m/f/d)**. The employee is assigned to develop, optimize, validate and perform immunological, biochemical and bacteriological assays for antigen discovery and drug development programs, preclinical and clinical testing including routine testing.

We are seeking the best in their profession to match our high standards, and in return, we provide a motivating and supportive work environment.

We offer

- Professional and pleasant working atmosphere
- Work surrounding fostering individual creativity
- Working conditions under highest ethical standards and concern for human health
- Highly innovative scientific work environment based on mutual trust and support
- Very engaging, responsible and diversified position
- Amenities and specifics of a small early-stage company
- Flexible working hours

Responsibilities

- Performance, analysis and documentation of test procedures (e.g. ELISA, FACS, functional immunological assays, cell culture, various microbiological methods)
- Focus on routine analytical or preparative bench work
- Development, optimization and validation of methods
- Application, maintenance and update of standard operating procedures (SOPs)
- Performance of GxP compliant activities and documentation
- Work in BSL2 environment in compliance with respective regulations

Qualifications and Professional Background

- Degree in the area of Life Sciences – BSc or MSc in Molecular Biology, Microbiology, Biotechnology or similar education
- At least 5 years of practical experience in a Research Associate function
- Experience within the pharmaceutical industry beneficial
- Experienced Research Associate with passion for performing routine hands-on lab work
- Experience with immunological, biochemical and microbiological assays including flow cytometry, ELISA, aseptic techniques, cell culture and microbiological methods
- Experience with skin cultures and 3D skin models are considered an advantage
- Experience with GxP compliant working and documentation

- Ability to work independently and pro-actively in problem solving
- A strong team player with adaptable and flexible personality
- Communicative personality with strong social skills
- Collaborative work attitude
- Pleasure to work in a start-up surrounding
- Highly reliable, responsible and curious personality who is open to learn and develop new skills
- Good command of MS Office applications
- Willing to work under BSL2 conditions during e.g. handling of biological samples
- High command of English is required, German knowledge is a plus

The collective agreement minimum salary we offer for this position is € 2.199,81 gross per month for full-time. The actual salary will depend on relevant experience and qualification of the designated candidate and will be negotiated at the time of the job offer. We explicitly encourage female candidates to apply for this position.

Does our description meet your expectations concerning your next career step? Then please send us your CV plus an informative motivation letter and convince us that you are the best candidate for this position. We are looking forward to receiving your application at recruiting@origimm.com.
